H OF

SIMPLE AND INGENUOUS. THE BYB BOOST YOUR BOOTH SYSTEM

The ByB Boost your Booth System is designed for exhibition booth construction, showrooms as well as stores or shops with high demands on appearance and flexibility.

SPACE SAVING TRANSPORTATION

The ByB Boost your Booth system offers an extremely space-saving transportation. An exhibition booth of 5x5 metres, for example, can be easily transported in an estate.

EASY AND FAST ASSEMBLY

The assembly of the ByB Boost your Booth System is very easy and fast and can be done by 2 persons only.

FLEXIBLE POSITIONING OF EQUIPMENT

Lighting technology and other equipment such as screens or advertising banners can be positioned flexibly and to the millimetre precise.

INVISIBLE CABLING

The square pipes are hollow and can be used to run cables invisibly through the pipes. The head has a rear cable exit. Catalogues or a laptop can be placed on a storage table and cables required can also be run invisibly through the hollow square pipes from the storage table.

The ByB Boost your Booth System in a nutshell:
Fast. Flexible. Easy to handle.

The grid system consists of our 200-2 Grid Truss which is available in different lengths from 500 mm to 5000 mm in 500 mm steps.

The legs are also available in different lengths. They are available in 400 mm, 600 mm, 800 mm, 1000 mm and 2000 mm lengths and are connected together as a plug-in system.

The legs are powder-coated light grey and the grid is black. Other colours are of course possible, too.

Thanks to the discreet colour scheme and the high-quality finishing of the stands including the invisible cable routing, the ByB Boost your Booth System is the perfect solution for small or medium-sized booths or presentation areas, as well as stores with high demands on appearance and flexibility, and are thus ideal for the presentation of high-quality products and services.

BYB BOOST YOUR BOOTH

The ByB Boost your Booth System is built from components of our proven Excellent Line and 200-2 Grid Truss Systems.
Fast. Flexible. Easy to handle.

200-2 GRID TRUSS

2-point bolt connected trusses are built from 50x3 mm main tubes and 50x50x30 mm spacers.

The 200-2 Grid Truss is available in the following lengths:
